

## Nepal Engineering Council:

### Launch of Professional Engineer (Nepal) Title.

#### Call for Support from Engineers with a Professional Title Recognised by the International Engineering Alliance (IEA)

The Nepal Engineering Council (NEC) is preparing to launch a professional title for engineers, PEng (Nepal). NEC kindly request all engineers working in Nepal and holding a professional engineering title recognised by the International Engineering Alliance (IEA) to support the first round of professional reviews for Senior Experience Route applicants. Further information can be found at <http://nec.gov.np/pages/Professional/>. Please contact [necgov@ntc.net.np](mailto:necgov@ntc.net.np) if you have any queries or to register your interest in becoming a Reviewer for this first phase of the PEng launch.

Having internationally recognised professional engineers conduct the first round of professional reviews will lend credibility to those reviews and the titles awarded. The first round of PEng(Nepal) title holders will then become the mentors and reviewers for subsequent professional reviews and support the wider phased launch of the Professional Engineer Title in Nepal.

Nearer the time of the reviews, there will be an orientation program targeted at this first batch of reviews. See the web page for tentative dates. The Senior Experience Route is open for one year for those with 20 years or more experience and is slightly different from the standard routes that will be introduced later. It relies more on an interview, rather than written submissions, centred on their broader experience and how this relates to the key criteria and competence profile required to attain the Professional Engineer title.

There is now a page on the NEC website that can be accessed by clicking on the link above or on the 'Professional Eng' tab at the top of the NEC home page. On this site you can download "Information for Reviewers", which explains what is required from the internationally qualified reviewers for this first round of Senior Experience Route reviews. It also gives a list of the IEA member institutions if you are unsure your qualification is recognised by them.

There is also a "Submission Form for Reviewers" which it would be useful if you could complete and send to the above email address. This helps ensure we have all the information about you, your qualifications and specialist area that we need to help assign reviewers to applicants for the reviews.

If you could submit your interest to join the Reviewer Roster for this first round of reviews to the above email by **Friday July 7<sup>th</sup> 2017**, it would be appreciated.

We have assigned a PEng administrator to support the establishment of the Reviewer Roster. She can be contacted via the above email or on 9840254137 if you have any queries.

We thank you in advance for your support to the NEC in their launch of the Professional Engineer title in Nepal.
